Regardless of settings in projects and property sheets the linker always uses /SAFESEH. This blocks compilations that use libraries compiled with previous versions.

it can be reproduced, when update to VS 2012, somehow vcxproj doesn't contain <UseDebugLibraries>true</UseDebugLibraries> xml string in Debug build, if you add it /SAFESEH disappears.

Inviato da simdoc in data 18/12/2012 alle ore 10:04

I'd like to know how it is getting turned on as well.

Inviato da Rocinante8 in data 30/08/2012 alle ore 01:02

Another workaround is adding <ImageHasSafeExceptionHandlers /> to your properties (e.g. Microsoft.Cpp.Win32.user.props). I still don't understand where it is turned on.

Inviato da Rocinante8 in data 29/08/2012 alle ore 22:46

I also see this problem with ATL projects updated from VS2010 to VS2012 (RTM). Jacob's workaround is effective but a headache to apply to many projects.

Hi, given that we have not heard back from you in these days. We will go ahead and close this Connect Issue. If you get a chance to review and provide the information requested earlier, you can go ahead and reactivate this issue.

Inviato da Microsoft in data 27/03/2012 alle ore 19:17

Can you share a sample project on which you are seeing this problem? Please zip the file and use "FeedbackID-730025" as prefix of the file name. You can use the following workspace to upload the file: https://sftus.one.microsoft.com/choosetransfer.aspx?key=aaa0f446-645a-4ee4-a0dc-fabac7d03aed Password is nnQfYi{c^}y#c+

I can only reproduce this with a project converted from VS2010 to VS2011 Beta (Version 11.0.50214.1 BETAREL). In my Project the linker command line shows /SAFESEH:NO but the build log shows that the linker gets called with /SAFESEH. I can work around this by explicitly specifying /SAFESEH:NO in "Linker->Command Line->Additional Options"
